R / Shiny Engineer · Scientific Software & Data Products

Pharma · Cosmetics · Biotech · Paris, France

Research Engineer & Data Scientist with 5+ years building production-grade software and data products in pharma, cosmetics, and biotech. R / Shiny delivery, reproducible analysis, stakeholder-facing architecture, and technical ownership from discovery through deployment. Background spans statistical modelling, scientific computing, internal platform tooling, and ML systems, with a strong interest toward maintainable delivery: documentation, validation, CI/CD, and handover for teams that need to keep using the product long after the first release.

Experience

Data Scientist & ML Engineer

Sep 2025 – present

Chanel Parfums Beauté R&D · via Astek / IT&M Stats

- Managed data science platform tooling across GitForge, Azure ML, Posit Connect, and Databricks, including deployment, access governance, and lifecycle management.
- Responsible for a catalog of 20+ R Shiny applications covering clinical data visualisation, formulation process automation, and enhanced data lifecycle management for researchers.
- Engineered reproducible MLOps and delivery infrastructure using Docker and Databricks.
- Designed and deployed computer vision models (object segmentation) for cosmetics formulation and regulatory R&D applications.

Data Scientist — Internal & Consulting

May – Sep 2025

Astek / IT&M Stats

- Led internal upskilling training on bayesian statistics with R for internal consultants.
- Developed reusable internal R packages and Quarto automated reporting templates.
- Contributed to internal data science projects by quickly adapting to the current team processes and tools, including Shiny app development, Python modules tooling, and data analysis.
- Fine-tuned Microsoft Phi-3-mini-4k-instruct (3.8B) using LoRA (PEFT) on the climatecheck dataset for claim verification, from data preparation to evaluation.

Data Scientist — Multi-omics

Dec 2024 – May 2025

Abolis · Microbiome Studio · via Astek / IT&M Stats

- Delivered end-to-end pipelines in R and Python for tabular and large-scale omics data, including genomics, transcriptomics, and metabolomics.
- Embedded as the sole data scientist in a fast-paced 8-person startup team building a SaaS product with a FastAPI backend and Vue.js front-end.
- Participated in scientific discussions with agri-food partners, including experimental design, data analysis, and ML approaches for multi-omics integration.

Data Scientist

Jul 2023 – Nov 2024

Sanofi R&D · Manufacturing Chain · via Astek / IT&M Stats

- Owned end-to-end delivery as sole R Shiny developer and Scrum Master, managing backlog, sprint ceremonies, and stakeholder alignment across researchers, managers, and project leads.
- Built R and Python applications to predict and simulate manufacturing plant resource capacity across global sites, driving drug production planning and decision-making from requirements through deployment.

Biostatistician

Nov 2021 – Jul 2023

L'Oréal R&I · Scientific Computing · via Astek / IT&M Stats

- Supported a senior statistician on exposome and clinical datasets, including biophysical, omics, and microbiome data.
- Characterised clinical phenotypes with multi-block, integrative, multivariate, and variable-selection approaches.
- Contributed to data-visualisation work, including Bayesian-network and other graphical approaches, while proposing suitable statistical methods.

- Defined analysis methodologies for proof-of-concept clinical studies; wrote statistical analysis plans, supported blind-review meetings, programmed analyses in R, and delivered reports for more than 100 clinical studies.

Earlier Experience

Data Scientist Intern — L'Oréal R&I · Augmented Beauty	Feb 2021 – Aug 2021
Modelled hair customer data for personalised recommendations, combining literature review, data management, statistical analyses, machine learning, and communication to Research&Innovation teams.	
Biostatistics Project Officer Intern — Da Volterra · Metagenomics Team	Feb 2020 – Aug 2020
Performed data management and non-parametric statistical analyses for gut-microbiome clinical studies, then prepared and presented results to biotechnology research teams.	
Data Scientist Intern — Flinders University · Digital Health Research Center	Sep 2019 – Jan 2020
Supported digital-health and wearables studies in R through questionnaire design, workshop preparation, statistical evaluation, and presentation of results to researchers.	

Education

Diplôme d'Ingénieur — Statistiques appliquées aux Sciences de la Vie (2021)
<i>Institut Agro - Agrocampus Ouest, Rennes</i>
Master — Mathématiques Appliquées · Statistiques (2021)
<i>INSA Rennes · Agrocampus Ouest · Université Rennes 2 · ENSAI · ENSAE (joint programme)</i>

Technical Skills

Languages	Python · R · SQL · Bash
Applications & delivery	R Shiny (golem) · FastAPI · Quarto · ggplot2 · Plotly · Streamlit
ML & AI	scikit-learn · PyTorch · Hugging Face · PEFT / LoRA · sentence-transformers · faster-whisper · OpenCV
Statistics & methods	DoE · Mixed Models · Bayesian optimisation · PLS · PERMANOVA · survival analysis · SPC
MLOps & infrastructure	Docker · GitHub Actions · Azure ML · Databricks · Posit Connect · renv · uv
Engineering & domains	Git · CI/CD · automated testing · architecture design · GxP · Clinical biostatistics · Multi-omics · Cosmetic R&D

Additional Information

Certifications	Languages
GitHub Foundations — GitHub (2024)	French (native)
Scrum Master — Agilbee (2023)	English (fluent, professional)
